- Worked on many **OSINT** cases, **Dark web** Investigations with **Army, Navy, Airforce**.

WORK EXPERIENCE

Cyint Technologies

Period: 29 Nov 2022 – 17 Nov 2025

Designation: - Instructor - Digital Forensics & Cyber Intelligence

Location: Delhi

Cyint Technologies is a Cyber/ Digital Forensic Company headquartered at New Delhi (India) serving clients Globally complying with all the Standards of Digital Forensics. We have executed numerous Projects of establishing Digital Forensic Laboratories, across many locations in India. We are a leading Technology equipped Cyber Intelligence Company Partnering with world renowned Digital Forensic Product Manufacturers across the Globe. Our Products and Services have successfully helped Organizations to protect their Business Assets and Investigate Cyber Crime & Fraud in Proactive and Reactive manner.

Responsibilities:

- Proficient in collecting and preserving digital evidence from various devices and sources, ensuring the integrity and chain of custody.
- Skilled in conducting in-depth forensic analysis of digital evidence using industry-standard tools and techniques, including file system analysis, memory forensics, network forensics, and malware analysis.
- Actively engaged in professional development and staying updated with the latest trends, techniques, and tools in digital forensics through training, certifications, and participation in industry conferences or communities.
- Ability to work collaboratively with cross-functional teams, **law enforcement agencies**, and **legal professionals**.
- Given CHFI trainings to various Law Enforcement agencies including **Indian-Army, CBI(Delhi), SVNIT(Surat)**
- **Developed a forensic triage tool** in C++ and Python to quickly analyze and extract key system data (e.g., file metadata, running processes, and network connections) for immediate use during on-site investigations.
- **Implemented key features** like real-time memory analysis and system health checks, enabling rapid decision-making for law enforcement and investigation teams.
- **Optimized tool performance** to ensure minimal system impact during data collection, with an emphasis on maintaining the integrity of evidence.

Craw Security

Designation: Mid Senior Forensic Analyst
